Directions:

- To decode a fender tag enter the codes from your fender tag and then press submit.
- Start entering codes from the bottom line (the bottom ones need to be lined up for the decoder to work.)
- All codes should be in uppercase.
- Double check all the codes or an unknown or wrong description will come up.
- The only required fields are the ones that are green. These are required to get a more accurate decoding of your fender tag.
- We have spent a lot of time entering in codes but we might have missed a few. If you find an error, please email me at [this link](#) [Link Fixed 2/21/2011].
- This decoder will not decode 1966 - 1968 fender tags or cars made from the Lynch Road plant. We have set up a service that will allow you to do this. If you are interested here is the link: Mopar Fender Tag Decoding Service [No Longer Available].
- To print out the decoding of your fender tag, press [Ctrl + P].
- This decoder is for personal use only. View [Disclaimer](#).
- Thank you, and enjoy.
